Machine Shop

- CNC Milling
- Drilling
- Turning
- Slotting

On-site Installation

With large capacity mobile cranes and mobile power units, BRUCE can meet customer requirements on-site, anywhere, at any time. Our site erection equipment includes fast tow welders, portable power generation equipment, air compressors, forklifts, telescopic forklifts etc – all essential to ensure a safe and speedy erection.

Project Management & Trained Site Personnel

In-house engineers to manage project from design to installation. Trained site personnel - Registered under the Contractors Safety Passport scheme or under the CSR scheme.

Risk Assessments

Method Statements and Risk Assessments are carried out by our own qualified Project Engineers and verified by our Health and Safety consultants.

Excellent Customer Service

We spend time with our customers once the machine is installed to monitor its performance and ensure the customer is gaining maximum productivity and efficiency from the machine. With dealers in various parts of the world and our highly skilled and experienced engineers and service team, we ensure the best quality of service and workmanship.

Spare Parts

As quality components are used throughout the machines we recommend you use only genuine parts. We manufacture parts in our factory and we can deliver them to you directly.
